FAMILY CARE INDONESIA

ACTIVITY REPORT

Humanitarian Project at Kebon Nanas JAKARTA

FAMILY CARE INDONESIA once more joined together with Saint Antonius Clinic for community social service in Kebon Nanas.

Thanks to the generosity of sponsors and Pondok Toejoeh alongside the help of Alumni FHUI 2008, free general medical assistance and

dental care was received by over 300 patients.

At the same time, over 700 families

received donations of basic items including rice, oil, sugar, soap, instant noodles, milk, coffee, and other household items. The recipients of these gifts for

the most part survive through collecting materials for recycling, heavy labor, or are buskers, housemaids, etc.

Drug Rehabilitation

BNN assists the entire country through its rehabilitation facilities with the BNP (Provincial Narcotics Body). The participants in the rehabilitation program based in Lido have increased in number and the program has been escalated. One way they have been able to manage this is through their new facility in the Thousand Islands.

Family Care Indonesia volunteers have likewise stepped up their role in the re-

habilitation by increasing the number of sessions they contribute through English language instruction, computer training and psychological guidance to the participants.

Included in their guidance sessions are such subjects as: valuing life, developing a positive outlook, personal cleanliness and manners (most drug addicts lose their sense of care for their surroundings), self-discipline, teamwork, overcoming vices, and teaching other positive traits.

Motivation for Graduating Students

On Sembilangan Island, where we have been working closely with the only local school for many years, we attended the year-end school graduation program and encouraged the ranking students to continue to study hard.

Part of our contribution included a small gift to motivate the students in their studies. The gift consisted of writing notebooks, perfume, a watch, a set of coloring pencils, and other things.

This is the second year we were able

to get involved in this school year-end program.

A special thanks to those who contributed towards the gifts given to the students!

Below: The happy graduates and their rewards.

Bringing Aid to Widows in North Jakarta

This month we've continued our work combatting the malnutrition problem that's prevalent in the **Cilincing** area, specifically through bringing aid and health education to low-income widows. We have been able to support this project regularly through the help of dedicated friends who are eager to make

a difference in other's lives.

We distributed rice, Indomie, baby formula and milk powder at two locations.

More Work on Flores Island

We visited Flores for the second time this year to continue our educational material distribution program at poor schools in West Flores.

On this trip we also brought along two volunteer trainees from Taiwan and Korea to experience firsthand the unique culture of East Indonesia and get an opportunity

Delivering sponsored educational materials to Mitra Penabur school in Palembang.

to be directly involved in our social projects.

Basing out of Ruteng, we distributed a large amount of educational supplies, clothing to the children many of whom lack such basic clothing items as underwear and shoes.

We are currently gathering more donated items for our next trip to Flores.
